The present invention provides a therapeutic agent or prophylactic agent for a disease that requires enhancement of nerve growth factor production, an enhancer for nerve growth factor production, or a food, beverage or feed for enhancing nerve growth factor production, each comprising as an effective ingredient a specified compound or a salt

thereof having enhancing activity for nerve growth factor production; a method for enhancing nerve growth factor production, comprising administering to a mammal the above-mentioned compound or a salt thereof; and use of the above-mentioned compound or a salt thereof in the preparation of a therapeutic agent or prophylactic agent for a disease that requires enhancement of nerve growth factor production, an enhancer for nerve growth factor production, or a food, beverage or feed for enhancing nerve growth factor production. In addition, the present invention provides novel compounds having enhancing activity for nerve growth factor production.

Title: (ENG) REMEDIES

Abstract: (ENG)

Remedies or preventives for diseases with a need for the enhancement of the production of nerve growth factor which contain as the active ingredient specific compounds having an activity of enhancing the production of nerve growth factor or salts thereof, agents for enhancing the production of nerve growth factor, or foods, drinks or feeds for enhancing the production of nerve growth factor; a method of enhancing the production of nerve growth factor which comprises administering the above compounds or salts thereof to mammals; and use of the above compounds or salts thereof in remedies or preventives for diseases with a need for the enhancement of the production of nerve growth factor, agents for enhancing the production of nerve growth factor, or foods, drinks or feeds for enhancing the production of nerve growth factor. Also, novel compounds having an activity of enhancing the production of nerve growth factor are provided.
